The humidification, dehumidification and purification all-in-one machine launched by Haier Zhijia was approved as a patented product on December 17, 2024. The all-in-one unit integrates the latest sensor technology and smart chips to monitor air quality changes in real time. Compared with peers, Midea and Gree only account for a third of Haier Zhijia's

patents. These patents cover a number of core technologies in the field of home appliances, providing strong support for Haier Smart Home's product innovation and brand competitiveness.
